

NAME

Maitreya Gupta

About Me

Coding Enthusiast — Hard Worker — Tech Explorer

Personal

DOB: 02.10.2000

Hobbies: Karate, KickBoxing,
Game Dev, Coding
Languages: Hindi, English,
Bengali

Technical Skills

Java • C • C++ • Python
• Django • HTML • CSS
• Godot Engine • VS Code

OBJECTIVE

Seeking an opportunity to apply my technical skills in a growth-oriented environment. To Learn more please visit my portfolio website:- [Portfolio Link](#)

EDUCATION

2023-	M.Tech (Intelligent Automation and Robotics) , Jadavpur University (On-going) Yearly YGP(till 2nd sem):-82.75 percent and CGPA:-8.67
2019-2023	B.Tech (Electronics and Communication) , St. Thomas College CGPA: 8.33
2017-2019	Patha Bhavan (12th: 65%)
2015-2017	Patha Bhavan (10th: 83.28%)

CERTIFICATIONS

- Clearance Certificate of IICC Round 1
- BSNL Telecom Training
- Fullstack Development - Coding Ninjas
- Python Basics - NULL STACK
- Python (Basic) - HackerRank
- SQL (Basic) - HackerRank
- NCET Core Branch Selection Certification with score
- Audio Transmission Using LED
- Excellence in Backend Module - Coding Ninjas
- Completion of Frontend Module - Coding Ninjas

PROJECTS

- **FullStack Web:** Shopping Page, Admin Panel, Inventory Manager Github For Main Landing Page
•A Ecommerce shopping website with built in Inventory management and also admin access to add or delete products
- **Android Job Portal App:** App + Video Demo
•Built for a particular freelance internship it is an app that can be used to post jobs internships, contact HRs and many such. Detailed description and video demonstration is given in drive
- **Dexters Laboratory** •A virtual Laboratory made with react that has multiple experiments shown via react and ll sliders re fully keyboard and hardware /rotary encoder compatible Hosted Link [GitHub Link](#)

PUBLISHED GODOT GAMES

- My [itch.io Games](#) Page
•A collection of Godot-based games I have developed and published, showcasing game-play mechanics, physics simulations, and creative design.

ROBOTICS PROJECTS & RELATED WORK

- Active and Main Member of IOTA Club (Internet Of Things Applications Club).

- Robotics Car Project — detects obstacles with IR Sensors and streams real-time data to backend server for image processing. Used Godot for this particular project and python interfacing for real time data streaming and sending image data to backend. [Drive Link](#)

FINAL YEAR PROJECT

- **Compact Wideband MIMO Antenna for 5G and IoT Applications**
 - Designed and implemented a four-element octagonal microstrip patch MIMO antenna on FR4 substrate (50mm × 50mm, $\epsilon_r = 4.3$) using CST Studio Suite.
 - Achieved wide operating bandwidth of **2.64–20 GHz**, covering sub-6 GHz 5G and IoT bands.
 - Obtained high isolation of **>20 dB**, peak gain of **6.53 dB**, and Envelope Correlation Coefficient (ECC) **< 0.01**, ensuring excellent diversity performance.
 - Fabricated and tested prototype in anechoic chamber, with measured results closely matching simulations.
 - Applications include IoT devices, mobile handsets, smart wearables, biomedical sensors, and wireless systems.

ACHIEVEMENTS

- State-level Bronze Winner in KickBoxing
- Gold Winner in Ju Srijan (Tech Fest of Jadavpur University)
